Kelly Roberts

Kelly Roberts is the Director of Litigation Technology Support for Stoel Rives, LLP. She oversees the firm's Relativity environment and the processing, hosting and management of eDiscovery. She leads the project management teams to design and handle delivery of client solutions in complex litigation matters. She has worked in the legal industry since 1984 with considerable experience in complex e-discovery matters, both with law firms and e-discovery vendors. Prior to her current role, Ms. Roberts was the Director of Technology and Solutions Architect for DTI's Portland office, where she was responsible for establishing local electronic discovery processing capabilities and overseeing all aspects of the electronic discovery process. In addition, Ms. Roberts was the Senior Consultant to clients, focusing on consulting and advising clients on how to effectively utilize technology to achieve success in complex e-discovery matters. Ms. Roberts' also held the role of Managed Services Implementation Manager at DTI. These roles saw her working directly with clients to ensure they were utilizing all of DTI's technology resources to fully obtain cost and time savings in their complex e-discovery matters, including utilizing ECA and predictive coding methodologies. Because of her operational and law firm experience, Ms. Roberts is uniquely situated to advise clients on both Attorney Assisted Review and Technology Assisted Review. Her work at DTI, and at law firms, has included case, project and staff management, implementation of leading edge e-discovery software, large document reviews, including electronic database management, trial and ADR preparation, and coordination and operation of multi-media trial presentations in Federal and State courts. Ms. Roberts studied Computer Science at Washington State University and is a Certified iConect Administrator.
