

My PDF Was Rejected, What Do I DO?

NextGen will automatically perform a PDF Check to evaluate PDF's as they are uploaded to ensure they meet validity and security requirements. The system scans all files before they are uploaded into CM/ECF and performs a check on the file size and file type. Any PDF larger than the maximum file size allowed will be rejected by the system.

The District of Idaho allows a maximum file size of 15MB for a PDF to be uploaded into CM/ECF.
